

RESERVED FOR HIGH FLYERS

RECOGNISING HIGHER ACHIEVEMENT

High achievers must have the freedom to travel anywhere in the world, often at short notice. They must have the facilities they need, as well as the comfort they want, wherever they go. They need that freedom and those facilities to be eco-friendly too. The Sukhoi Business Jet recognises those needs, and provides the solution.

COMFORT, PERFORMANCE AND LUXURY

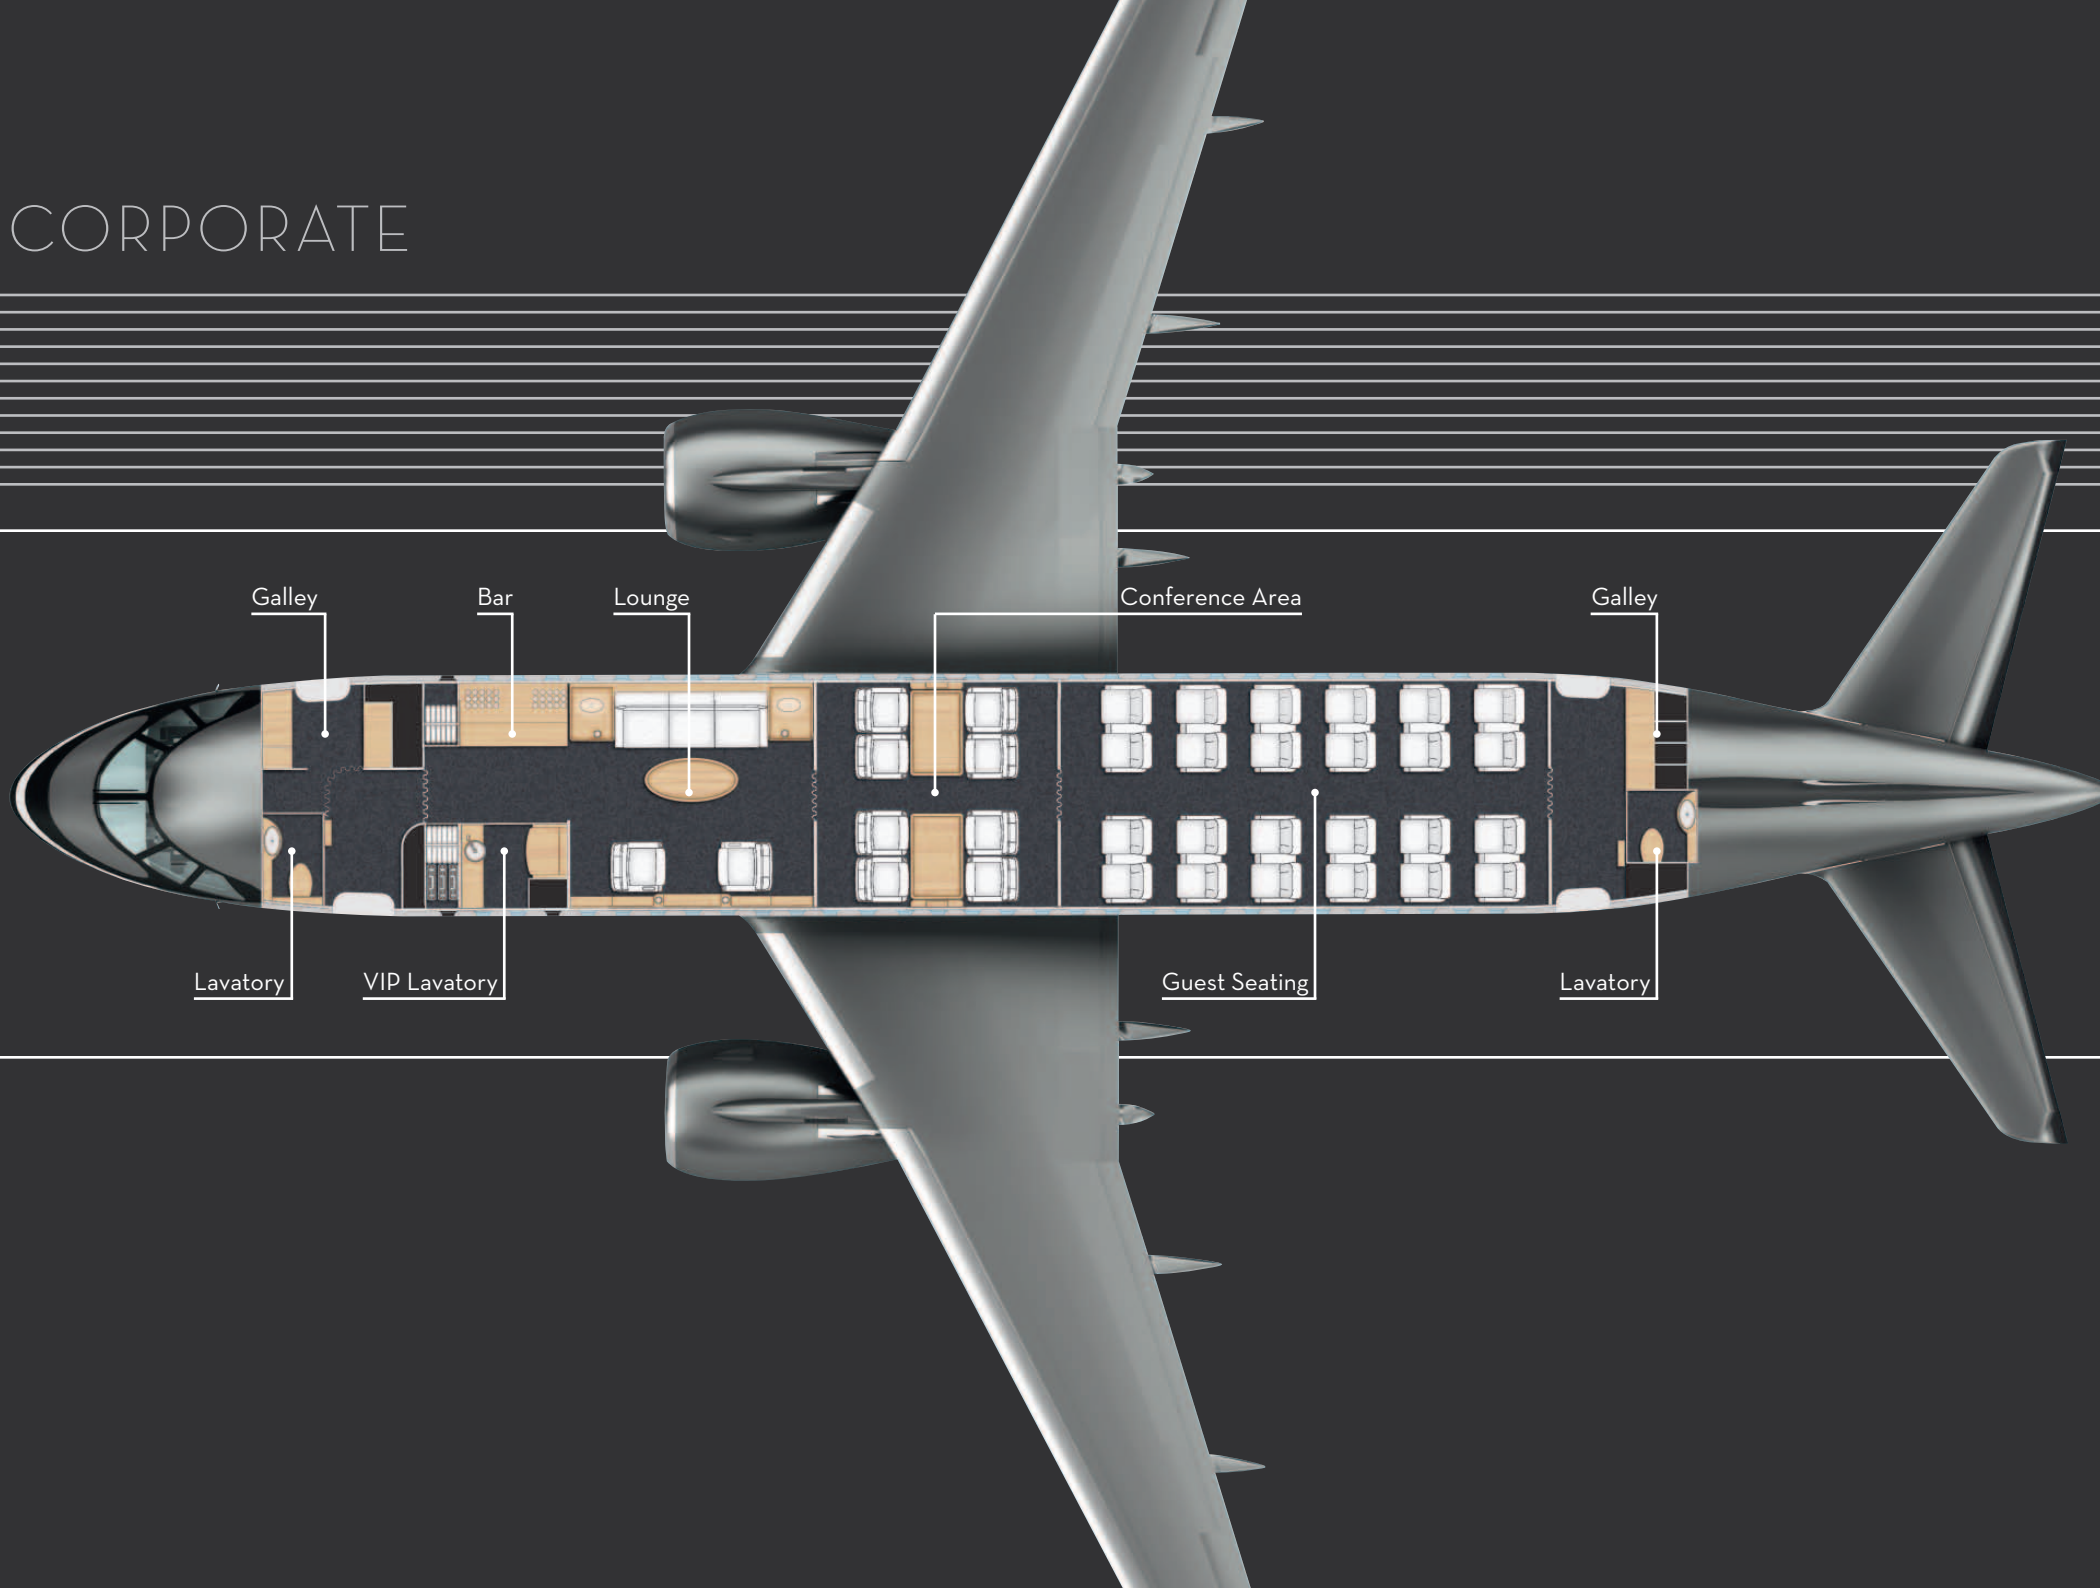

With much more space than any other Business Jet in its class, the Sukhoi Business Jet offers more scope for comfort, luxury and facilities; and for interiors tailored around your preferences and reflecting your prestige.

Versions are available for Corporate, Government and VIP users. All can be configured with the features - from staterooms, conference rooms and communications suites to staff accommodation - that you dictate.

SUKHOI BUSINESS

In Partnership with Alenia Aermacchi

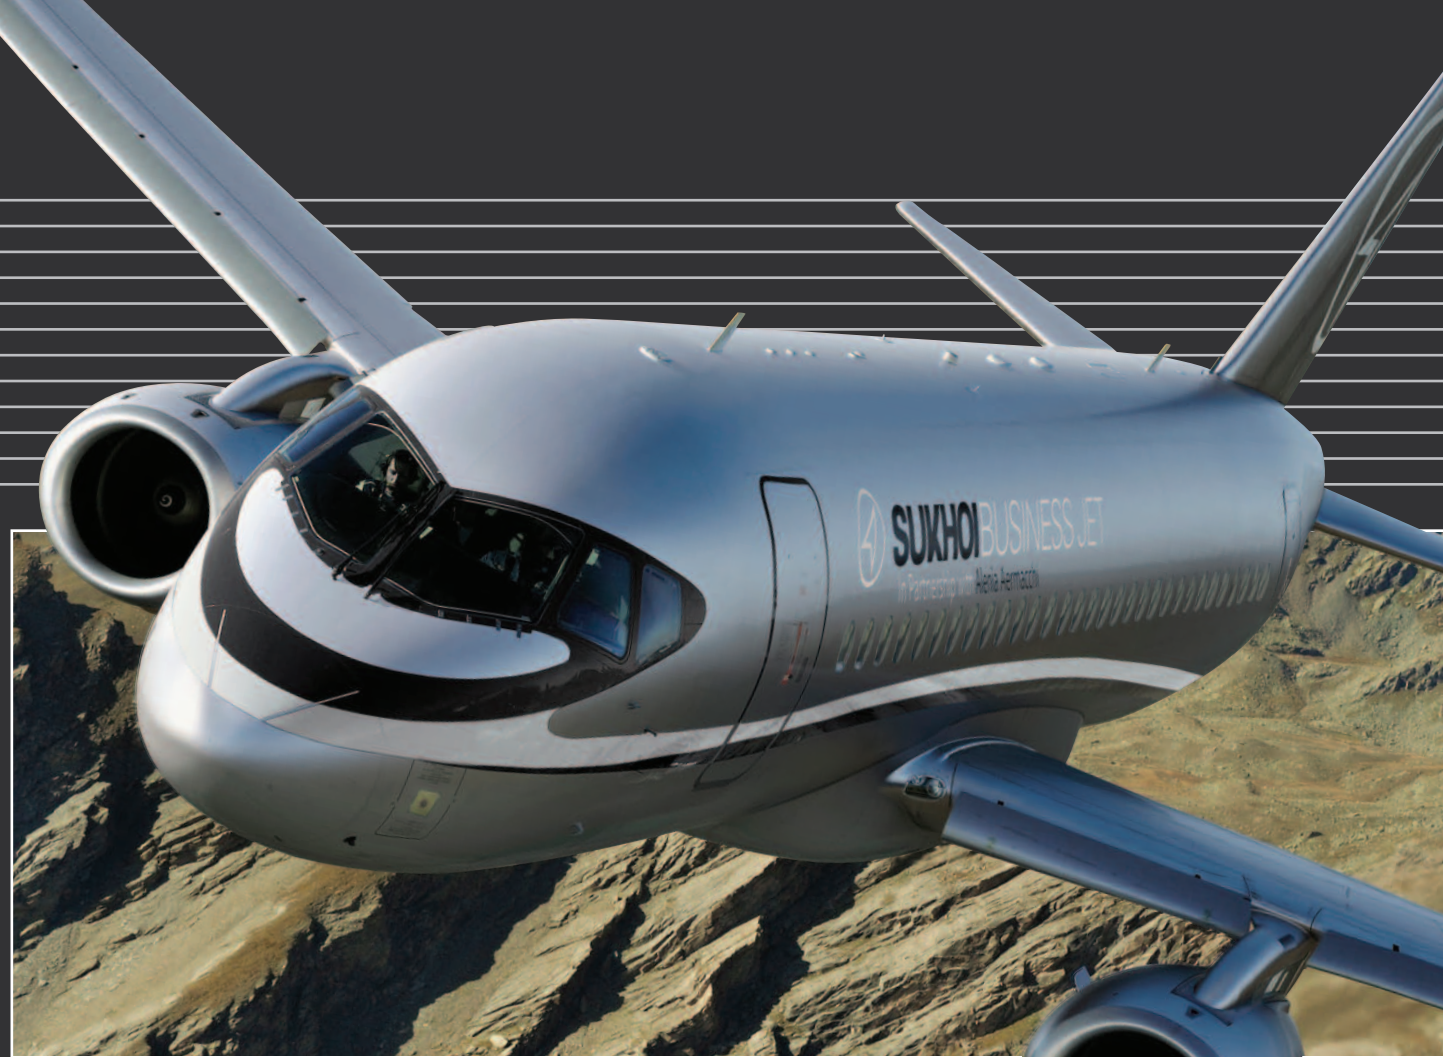

A HIGHER LEVEL OF LUXURY

The Sukhoi Business Jet - SBJ - has been developed to be the most advanced executive business aircraft in service today.

It combines the cabin space of an airliner with the luxury of bespoke Italian interior design, optimising style and quality with effective, practical answers to your requirements. It also offers cutting edge airframe and engine technology, ensuring that the higher level of luxury offered by the SBJ can be provided with a cost performance more typical of a standard executive aircraft.

POWER AND PERFORMANCE

The SBJ is powered by two SaM146 turbo-fans from PowerJet, a joint venture between SNECMA of France and NPO Saturn of Russia.

Thanks to new technologies which include state-of-the-art avionics and deliver advanced performance you can fly your SBJ to any airport in the world and during all kinds of weather conditions as well.

Latest Thales Avionic Suite

- Five large Liquid Crystal Display Screens
- Integrated Modular Avionics with full duplex Ethernet
- Centralised Maintenance System
- Navigation, Communication and Surveillance Systems:
 - Weather Radar with enhanced functionality including Predictive Windshear and Turbulence Detection
 - Controller Pilot Data Link Communication
- Class II Electronic Flight Bags
- Swift Broadcast SATCOM

Protecting the environment

The SBJ can offer a higher level of environmental performance too. Noise and emission levels for all the Sukhoi SuperJet 100 family are better than those required by the latest ICAO rules, ensuring a quieter more comfortable interior. Thanks to its advanced engines and its unmatched aerodynamics, the SBJ is compliant with existing and planned environmental regulations.

CO₂ emissions are reduced, cutting pollution and helping to enhance your personal and corporate environmental credentials.
